

**Annual EFHSS Workshop 2005
First Latvian Workshop "CSSD"**

**June 2nd to June 4th, 2005
Riga, Latvia**

Ladies and Gentlemen, Dear Friends and Colleagues

The big success of our conference in Bulgaria has confirmed us to carry out the "East European Workshop" annually under the flag of the EFHSS and parallel to the European conferences of the EFHSS in different Eastern European countries.

The next Eastern European Workshop will take place in Riga, Latvia from June 2nd to June 4th 2005.

We will invite all of the Baltic States so that a "three country workshop" will be created.

The annual workshop shall bring partners from practice, science, politics and industry together to kick off to a partnership for the future.

We expect approximately 100 participants from each of the three Baltic States, out of CSSD, epidemiology, microbiology and the medical leaders of the large hospitals as well as participants from Eastern Europe and from the EFHSS.

We would also be pleased to welcome you also at this event as participant and partner. We would like to give you the possibility as industrial partner, to participate with a stand in the industry exhibition and perhaps make a 20-minute presentation of your products with direct reference to our workshop topic 'Education'.

We look forward to you registering your presentation with us.

With best regards
On behalf of the organization committee

Cornelia Hugo
